PROFESSIONAL SUMMARY

Junior software developer with commercial experience developing, testing, and maintaining live C# and .NET backend systems. Experienced in automated testing, debugging production issues, and supporting reliable software in live environments. Comfortable contributing within agile teams through collaboration, code reviews, and continuous learning.

EXPERIENCE

Junior Software Engineer

June 2025 – Present

Frog Parking

Manawatū, NZ

- Worked within a large production C#/.NET codebase supporting distributed embedded parking infrastructure.
- Debugged and resolved production issues across a distributed C#/.NET platform involving REST APIs, SQL databases, embedded controllers, and Azure messaging infrastructure.
- Developed and maintained automated tests using MSTest to improve reliability and reduce regression risk.
- Collaborated in an agile team, contributing to production systems and participating in code reviews.
- Supported security and compliance initiatives by reviewing code and system behaviour for PCI and SOC 2 requirements, including identifying logging and data-handling risks.
- Built and maintained integrations and backend workflows for production parking systems, supporting reliable data flow between services and field devices.

Software Engineer Intern

Nov. 2023 – Jan. 2024 and Nov. 2024 – Feb. 2025

Kahu EV

Manawatū, NZ

- Designed and implemented a geospatial data pipeline integrating multiple data sources (OpenStreetMap, elevation models).
- Developed web-based interfaces for route and vehicle simulation, including interactive map-based inputs and dynamic forms.
- Worked across backend logic, data processing, and UI development in collaboration with a cross-functional engineering team.
- Developed internal tools and dashboards for visualising vehicle telemetry and operational data to support troubleshooting and analysis.
- Integrated EV energy consumption simulation into the production system, where results were used to support sales and customer decision-making.

EDUCATION

University of Canterbury

Christchurch, NZ

Bachelor of Software Engineering with Honours

Feb. 2021 – Nov. 2024
