PROFESSIONAL SUMMARY

EXPERIENCE

Junior Software Engineer

June 2025 – Present

Frog Parking

Manawatū, NZ

- Worked within a large production C#/.NET codebase supporting distributed embedded parking infrastructure.
- Debugged and resolved cross-system issues involving REST APIs, SQL databases, and Azure messaging infrastructure, improving reliability across production workflows.
- Built and deployed an integration pipeline ingesting external parking data (Orikan) via REST APIs into SQL-backed systems for downstream processing and reporting.
- Supported security and compliance initiatives by reviewing code and system behaviour for PCI and SOC 2 requirements, including identifying logging and data-handling risks.

Software Engineer Intern

Nov. 2023 – Jan. 2024 and Nov. 2024 – Feb. 2025

Kahu EV

Manawatū, NZ

- Designed and implemented a geospatial data pipeline integrating multiple data sources (OpenStreetMap, elevation models).
- Built and integrated a vehicle energy consumption simulation feature into a production system used for customer decision-making.
- Validated simulation outputs against real-world vehicle telemetry to quantify model error and ensure reliability.
- Iteratively profiled and optimised the vehicle simulator to meet a sub-5-minute runtime target for cross-USA route trip simulation.
- Integrated EV energy consumption simulation into the production system, where results were used to support sales and customer decision-making.

EDUCATION

University of Canterbury

Christchurch, NZ

Bachelor of Software Engineering with Honours

Feb. 2021 – Nov. 2024
